## Features

- Direct operated directional solenoid valve, standard version
- Porting pattern according to DIN 24 340 form A, ISO 4401 and CETOP-RP 121 H
- Wet-pin AC or DC solenoids with detachable coil
- Pressure-tight chamber needs not to be opened for a coil change
- Electrical connection as individual or central connection

## Function and configuration

Type WE valves are solenoid operated directional spool valves. They control the start, stop and direction of flow.

The directional control valves consist of housing (1), one or two solenoids (2), the control spool (3), and one or two return springs (4).

In the de-energized condition the control spool (3) is held in the neutral or initial position by means of return springs (4) (except for impulse spools).

The control spool (3) is actuated via wet pin solenoids (2).

To ensure proper operation, care must be taken that the pressure chamber of the solenoid is filled with oil.

The control spool(3) is moved to the expected position by solenoid(2) and pushing rod(5). This gives free-flow from P to A and B to T or P to B and A to T.

When solenoid (2) is de-energized, the control spool (3) is returned to its initial position by means of the return springs (4).

The solenoids may also control the control spool (3) by an optional override button(6) under the de-energized condition.

### Type 4WE 6.. L6X/O...

(only for symbols A, C and D)

This version refers to directional valves with two spool positions and two solenoids without detent. In the de-energized condition, there is no defined spool position.

### Type 4WE 6.. L6X/OF...

(impulse spool, only for symbols A, C and D)

This version refers to directional valves with two spool positions, two solenoids and a detent. Due to this, both spool positions are positively held, and a permanent energization of the solenoid is not required.

### Throttle insert (type 4WE 6..L6X/.../B.. )

The use of throttle inserts is required, due to prevailing operating conditions, flows can occur during switching processes that exceed the performance limit of the valve. They are inserted in the P-channel of the directional valve.

Performance limits (Measured at  $\theta_{oil}=40^{\circ}\text{C} \pm 5^{\circ}\text{C}$ , using HLP46)

The specified switching performance limits are valid with two directions of flow (e.g. from P to A and simultaneous return flow from B to T).

Due to the flow forces acting within the valve, the permissible switching performance limit can be significantly lower with only one direction of flow (e.g. from P to A, with port B being closed)!

The switching performance limit was determined with the solenoid at operating temperature, at 15 % under-voltage and without tank pre-loading.

## Valve with DC or rectification AC solenoid

**Notes:** 4 hexagon socket head cap screws UNC  
 10-24 UNC  $\times$  2" ASTM-A574 (separate order)  
 (Friction coefficient  $\mu_{\text{total}} = 0.19$  to  $0.24$ ) ;  
 Tightening torque  $M_A = 11\text{Nm}$  [8.2ft-lbs]  $\pm 15\%$   
 (Friction coefficient  $\mu_{\text{total}} = 0.12$  to  $0.17$ ) ;  
 Tightening torque  $M_A = 8\text{Nm}$  [5.9ft-lbs]  $\pm 10\%$

**It must be ordered separately,  
 if connection plate is needed.**

**Type:** G341/01(G1/4), G341/02 (M14  $\times$  1.5)  
 G342/01(G3/8), G342/02 (M18  $\times$  1.5)  
 G502/01(G1/2), G502/02 (M22  $\times$  1.5)

- 1 Solenoid
- 2 Manual override button
- 3.1 Plug-in connector to DIN 43 650
- 3.2 Deutsch connector assembly
- 4 Junction box with lead and light, M22  $\times$  1.5 interface
- 5 Nameplate
- 6 O-ring: 9.25  $\times$  1.78
- 7 Plug screw for valves with one solenoid
- 8 Space required to remove connector
- 9 Space required to remove coil
- 10.1 Dimension of 3-position valves, standard version
- 10.2 Dimension of 3-position valves, large-scope Type of voltage

- 11.1 Dimension of 2-position valves with solenoid at 'A', standard version
- 11.2 Dimension of 2-position valves with solenoid at 'A', large-scope Type of voltage
- 12.1 Dimension of 2-position valves with solenoid at 'B', standard version
- 12.2 Dimension of 2-position valves with solenoid at 'B', large-scope Type of voltage
- 13 Securing nut, tightening torque  $M_A = 4\text{Nm}$
- 14 Valve fixing screws. Hexagon socket head cap screw M5  $\times$  50 GB/T 70.1-10.9, Tightening torque  $M_A = 8.9\text{Nm}$
